

Team Number: 109-4

Name: Team Supreme

Members: Zeyu Feng, Jackson DuBart, Kalei Lewis, John Griffin, Erik Rhodes

User Acceptance Testing

Tasks	Test Case #	Test Description	Steps to test
User login	1	Verify that user with correct username and password can login successfully	Create Test User and Verify that you can login successfully with correct information
Login verification	2	Verify that user with incorrect username/password receives an error message	Input username and password that is not saved in database
Login Verification	3	Verify that a user who forgets to input username/password receives an error message	Click login button without inputting anything into username or password field
Save character data	4	Verify that data (character name, skills, spells) for a particular user can be saved to our database	Login as test user, enter information into the sheet, attempt to save, and examine database directly to determine if the data is there
Load character data	5	Verify that a user's saved data can be loaded upon login	Create Test User and verify that the saved data is visible
Character Sheet Calculations	6	Verify that any calculations done by the character sheet are correct	Perform sample calculations by hand and verify their correctness
