### Features:

The features we are using still include traits, skills, spells, log in page, and leveling, which has been integrated into the traits. The traits altogether include height, weight, gender, and the level of the player.

The most prioritized feature is the homepage, which includes the traits, skills, spells, and character picture. The second more prioritized feature is the log in page. This feature is very important as it allows the player to log in and look at their information and no other player's information.
